Front-end Developer

Aleksander M.

Summary

- 7+ years of commercial experience in IT
- Experience in developing applications using JavaScript (React)
- Responsible, hard-working, result-oriented, creative and communicative, team player
- Aspire for self-education and self-improvement
- Willing to accept feedback and offer suggestions
- Good attention to details
- Good logical thinking and team player.

Skills / Competencies

Programming Languages	JavaScript, TypeScript
Technologies/Frameworks /Libraries	HTML, CSS, LESS, SCSS, SASS, React, Redux, Redux-saga, React-query, Redux-thunk, React-router, Rx.js, Electron, Webpack, Gulp, GraphQL, Bootstrap4, NextJs, Mobx, Jest, Mui, AntD, GoogleMaps API, Recharts
Source Controls	GIT, Asana
Tracking Systems	Jira, Redmine
Operational Systems	Windows, Linux, Mac OS
Development Methodologies	SCRUM, Kanban
Language	English – Intermediate
Education	Kharkiv National University of Radio Electronics 20017 -2019, Master's degree in electronic systems and devices

Experience

CHI Software	November 2019 – Present Front-end Developer
"AN.WORKS"	January 2019 – November 2019 Front-end Developer
LLC "MOBILSOFT"	August 2018 – December 2018 Front-end Developer
Freelance	January 2017 – April 2017 Markup Developer

Projects

1. PeerMarket	
Project duration	Aug 2023 - Present
Technologies	React, JS/TypeScript, Context API, Redux, maps, charts, tables, REST API, WebSocket, i18next, CSS animations, 2D and 3D visualisations based on JS/CSS/SVG/Canvas, AWS etc.
About the project	Coin exchange service is an online marketplace where users buy, sell, and trade cryptocurrency, also clients can deposit fiat currency and use those funds to purchase cryptocurrency. Explorer allows clients to find, sort, and filter blockchain blocks, transactions, also users can view visualisations with maps or charts for blockchain nodes info etc.
Role	Front-end developer
Responsibilities	• Developing UI and implementing new functionality. • Create test and testing of won features • Documenting test plans. • Bugs fixing. • Conducting code review.

2. TylerTech	
Project duration	Apr 2023 - Aug 2023
Technologies	React JS, Redux, Redux-saga, Redux-toolkit, Formik, Yup, DayJS, material-ui, Okta auth, Axios, Mapbox GL, react-flow-renderer, react-querybuilder, iasWorld, pictometry, cyclomedia, arcGIS, mapbox, nearmap
About the project	Internal software to work on real estate appraisal. The platform allows you to select a plot and get all information about it, such as location, parameters, infrastructure, roads. With the help of third-party services iasWorld, mapbox, pictometry, cyclomedia, arcGIS it is possible to view photos of land plots and 3D models.
Role	Front-end developer
Responsibilities	• Developing UI and implementing new functionality. • Building reusable components for future use. Work with integration. • Bugs fixing.

	• Conducting code review.

3. Fintech

Project duration	Aug 2022 - Apr 2023
Technologies	React, Redux, Redux-saga, Redux-toolkit, Formik, Yup, react-query, prop-types, dayJs, rc-table
About the project	The back office of the loan system for internal staff works with incoming applications, as well as the rest of the borrowers and users data. Works in conjunction with the front office, which is a client portal for creating and managing loans.
Role	Front-end developer
Responsibilities	• Developing UI and implementing new functionality. • Building reusable components for future use. • Work with integration. • Bugs fixing. • Conducting code review.

4. Fintech

Project duration	Dec 2021 – Apr 2022
Technologies	React, Redux, Redux saga, NextJs, Persist, SCSS, SWR
About the project	Platform for a Seller onboarding flow, Underwriting flow, a Payment dashboard. Sellers go through the Sign Up and verification process to be approved and get access to the main functions of the system - creating and selling of products.
Role	Front-end developer
Responsibilities	• Developing UI and implementing new functionality. • Building reusable components for future use. • Work with integration. • Bugs fixing. • Conducting code review.

5. Smart Suite/Tracking system

Project duration	Apr 2022 - Aug 2022
Technologies	jReact, React-Router, Mobx, SASS, Angular, Rx.js, Webpack, Typescript, Jest, Testing-library
About the project	No Code Platform provides business process automation capabilities that will allow citizen developers (business analysts, office administrators and small-business owners) to quickly configure and deploy Solutions they need to run their business.
Role	Front-end developer
Responsibilities	• Developing UI and implementing new functionality. • Create test and testing of won features. • Documenting test plans. • Bugs fixing. • Conducting code review.

6. CRM system

Project duration	Aug 2021 – Dec 2021
Technologies	React, Redux, Redux-thunk, React-router, GraphQL, CryptoJs, SCSS
About the project	CRM system for exchanging cryptocurrency. Asset management, exchange calculators, updating the value of coins in real time, blocking some assets during exchange, interacting with contracts, and three-way signing were implemented.
Role	Front-end development
Responsibilities	• Creating application from scratch. • Developing UI and create new functionality. • General maintenance bug fixes. • Integration with monitoring system. • Working with websockets.

7. Job search

Project duration	Aug 2021 – Dec 2021
Technologies	React, Redux, React-Router, Webpack, Redux-thunk, SCSS
About the project	Web-application for recruiting and searching for vacancies for a training position or a junior specialist in the IT sphere. Users can pass different types of tests for specializations. Profile rating system, view statistics, analysis of activities were created.
Role	Front-end development
Responsibilities	• Using microservice architecture. • Building new microservices. • Developing new functionality (UI changes, microservice functionality, database stored procedures). • Testing of own features, documenting code. • Fixing bugs.

8. Blockchain

Project duration	Sept 2020 – Feb 2021
Technologies	React, React-router, Redux, SCSS, MetaMask
About the project	Web-application for air travel insurance. Interaction with smart contracts, insurance of the upcoming flight with the ability to pay with cryptocurrency were implemented. Insurance package calculator was built-in. The main goal is the ability of the client to receive compensation if the air flight was delayed.
Role	Front-end development
Responsibilities	• Developing UI and create new functionality. • General maintenance bug fixes. • Integrations with a flight service. • Testing of won features.

9. Game tech

Project duration	Jan 2020 – Sept 2020
Technologies	JS, HTML5, Canvas, LESS, WEBPACK
About the project	Browser games work with someone else's code (previously developed game core).
Role	Front-end development

10. B2B

Project duration	May 2019 – Jan 2020
Technologies	Ajax, jQuery, JS, Gulp, SASS, Bootstrap4
About the project	Internal company project, company website for b2b automation and generation.
Role	Front-end development

11. Entertainment

Project duration	Nov 2018 – May 2019
Technologies	Rx.js, Angular, SCSS
About the project	Gaming cloud platform.
Role	Front-end development

12. Go2trade

Project duration	Jan 2017 – Nov 2018

Technologies	HTML, JS, SCSS, JQUERY, AJAX, GULP
About the project	Company website, Brokerage specialising in Cryptocurrency Broking & Consultancy services for private investors.
Role	Front-end development
