Mark Misra

Senior Frontend Developer

Summary of Qualifications

I am a front-end developer with a strong passion for creating dynamic and visually stunning user interfaces. My expertise lies in JavaScript and TypeScript, and I specialize in building modern, responsive web applications. I work primarily with ReactJS, along with frameworks like NextJS and GatsbyJS, to deliver high-performance solutions. For state management, I leverage Redux to create scalable and efficient applications. Over the past year, I've been leading a development team, guiding projects from concept to completion while fostering collaboration and ensuring high-quality results. Throughout my career, I've contributed to a variety of successful projects in industries such as cryptocurrency, e-commerce, healthcare, and more. Each project has been thoughtfully crafted and continues to meet its goals effectively.

Skills

Programming Languages/Technologies

- Software Architecture Design/ UML/ Reverse Engineering/Design Patterns
- ReactJS/NextJS/GatsbyJS/Redux
- JavaScript/TypeScript/DHTML/HTML/ CSS/Ajax
- TailwindCSS/CSS Modules/Sass/Styled Components

Methodologies

- Agile, Scrum, XP
- Pair Programming
- Test Driven, Feature Driven, Behavior Driven Development
- Waterfall

Development Tools

- WebStorm
- Microsoft Visual Studio
- VSCode/Cursor
- Chrome DevTools

Testing Tools

- Postman
- BurpSuite
- jTest
- Mocha
- Ghost Inspector

Operating Systems

- Microsoft Windows (10/11)
- Linux/Ubuntu/Kali Linux
- MacOS

Hardware

- Network technologies
- Different technological device

Experience

Mascode

Project Description: Government project to process criminal proceedings. High security solution built using microfrontend approach. Has AI integrations to analyse documents and manage different entities

Customer: Gov. Company

Involvement Duration:	8 months
Project Role:	Senior Front End Developer
Responsibilities:	▪ Architecture and design; ▪ Knowledge sharing, coaching; ▪ Requirements analysis and clarification; ▪ Estimation, prioritization, and distribution of tasks; ▪ Code development; ▪ Development build and deployment scripts; ▪ Product support and documentation maintenance.
Project Team Size:	12 members
Tools & Technologies:	NextJS, ReactJS, Styled Components, Nexus Repository, TypeScript, Storybook, MUI

shib.io

Project Description:	Top-10 crypto tokens crypto platform that allows user to deep dive into project's ecosystem and visit various services that are integrated into that platform: DeFi, Nft-Marketplace, Social network, Crypto Wallet, GameFi and many other. The platform is a complex solution to onboard and educate user to work with the ecosystem.
Customer:	US company
Involvement Duration:	9 months
Project Role:	Lead Frontend Developer
Responsibilities:	▪ Code refactoring; ▪ Development complex architecture from scratch; ▪ Managing team of 12 developers; ▪ Set up of gitflow; ▪ Implementation of new features; ▪ Work with designers; ▪ Communication with customer; ▪ Requirement analysis; ▪ Work with the blockchain team; ▪ Code review;
Project Team Size:	12-20 members
Tools & Technologies:	ReactJS, NextJS, TypeScript, TailwindCSS, shadcn, Webpack Module Federation, Apollo Client, React Query (TanStack), wagmi, ethers.js, viem

Equadyne

Project Description:	Platform that leverages the inherent security and transparency of blockchain technology to provide a robust non-custodial financial ecosystem. The platform employs advanced smart contract protocols to facilitate autonomous and secure transactions, ensuring exclusive control over assets without intermediaries.
Customer:	US company
Involvement Duration:	4 Months

Project Role: Key Frontend Developer

Responsibilities:

- Code refactoring;
- Implementation of new features;
- Work with designers;
- Communication with customer;
- Requirement analysis;
- Work with the blockchain team;
- Code review;
- Add animations

Project Team Size: 5 members

Tools & Technologies: ReactJS, NextJS, TypeScript, Module CSS, Framer Motion, GSAP, REST API, TanStack React Query

VestChain

Project Description: Platform that is aimed to enable users to trade perpetuals.

Customer: US company

Involvement Duration: 4 Months

Project Role: Frontend Developer

Responsibilities:

- Code review
- Development of new functionality
- Smart Contract Integration
- Work with cross-teams
- Code refactoring
- Add animations
- Communication with a customer

Project Team Size: 4 members

Tools & Technologies: ReactJS/NextJS, TypeScript, viem, wagmi, TailwindCSS, REST Api, TanStack React Query

Project Ewallet Gold [Canadian Bank]

Project Description: Development of E-banking application that allows users to manage their banking account

Customer: Canadian company

Involvement Duration: 2 months

Project Role: Frontend Developer

Responsibilities:

- Code review
- Development of new functionality
- Requirement analysis
- Work with cross-teams
- Code refactoring
- Communication with a customer

Project Team Size:	7 members
Tools & Technologies:	ReactJS, CSS Modules, TypeScript, REST Api, TanStack React Query

Leapfrog builders Healthcare platform

Project Description:	Project to store and analyse patient data
Customer:	US company
Involvement Duration:	6 Months
Project Role:	Frontend Developer
Responsibilities:	▪ Code review ▪ Development of new functionality ▪ Requirement analysis ▪ Work with cross-teams ▪ Code refactoring ▪ Communication with a customer
Project Team Size:	6 members
Tools & Technologies:	OAuth, ReactJS, TypeScript, React Query (TanStack), yup, React Hook Form

britegrove.com

Project Description:	Development of corporate website and careers portal
Customer:	Ukrainian company
Involvement Duration:	5 Months
Project Role:	Frontend Developer
Responsibilities:	▪ Development of new features ▪ Animation integration ▪ CI/CD process set up ▪ Work with Designer team ▪ Client communication
Project Team Size:	2 members
Tools & Technologies:	VueJS, GSAP, Wordpress

Healthcare Platform

Project Description:	Development of healthcare platform that allows share patient data, edit, store it and sign it with e-document management tools. Development of component library
Customer:	US company
Involvement Duration:	16 Months
Project Role:	Frontend Developer

Responsibilities:

- Code review
- Development of new functionality
- Requirement analysis
- Work with cross-teams
- Code refactoring
- Communication with a customer

Project Team Size: 8 members

Tools & Technologies: ReactJS, Webdriver Tests, JUnit, REST api

Ukrainians in Motion

Project Description: Application that allowed refugees to find Legal Assistance nearby

Customer: Ukrainian company

Involvement Duration: 6 Months

Project Role: Frontend Developer

Responsibilities:

- Code review
- Development of new functionality
- Requirement analysis
- Work with cross-teams
- Code refactoring
- Communication with a customer

Project Team Size: 3 Members

Tools & Technologies: ReactJS, CSS Modules, TypeScript, REST Api, TanStack React Query

Security SDK

Project Description: Development of SDK for cross-platform mobile development. SDK provides in-app security, IPCs, presence, push, directory lookup, single sign-on authentication, and identity and access management.

Customer: Blackberry

Involvement Duration: 8 Months

Project Role: C++ Developer

Responsibilities:

- Code review
- Development of new functionality
- Requirement analysis
- Work with cross-teams
- Code refactoring
- Communication with a customer

Project Team Size: 6 members

Tools & Technologies: C/C++, JNI, Java, Unit, Swift, Objective C

	Automative project
Project Description:	Working on an Automotive project. The project aim is to optimize existing and implement new features. These solutions are deployed in modern European cars.
Customer:	US company
Involvement Duration:	12 months
Project Role:	C++ Developer
Responsibilities:	▪ Code review ▪ Development of new functionality ▪ Requirement analysis ▪ Work with cross-teams ▪ Code refactoring ▪ Communication with a customer
Project Team Size:	8 members
Tools & Technologies:	C/C++, aidl, Java, Gtest

Certifications	Front-End Developer Capstone 2025	Meta
	GitHub Copilot Beginner to Pro - Al for Coding & Development	udemy

Education	**Master** Kyiv National University of Technologies and Design Computer Science **Bachelor** Oles Honchar Dnipro National University Computer Science
